

High R Thermal Performance
DesignR Profile™

- ◆ High R System with a Design Feature
 - ◆ Ceiling Look
- ◆ Total R-Value of R-38 that Installed, Yields a "Tested" R-30 in Place
 - ◆ OSHA Approved Fall Protection System

Step #1

R•O•O•F

300 Series machines provide a guarded work zone where roofers work without the need for tie-off. During the roofing phase, DesignR insulation ceiling fabric PVC grid between the purlins is installed from the 300 Series platform.

Step #2

F•I•N•I•S•H

A lift is used to insert the final piece of PVC grid parallel to the purlins that seam adjacent pieces of fabric.
